

Weekly Operations Summary

Single-Location NYC Recreational Retailer · Illustrative Synthetic Data · Brooklyn, NY Profile

WEEK SNAPSHOT

\$44,800 WEEKLY REVENUE	+6.2% VS. PRIOR WEEK	753 TRANSACTIONS	\$59 AVG TICKET
---	--	--	---------------------------------------

WEEK-OVER-WEEK COMPARISON

REVENUE \$44,800 +\$2,600 (+6.2%) vs. prior week	TRANSACTIONS 753 +39 vs. 714 prior	AVG TICKET \$59 vs. \$59 prior week	UNITS SOLD 1,847 2.5 units / transaction
---	---	--	---

Revenue up +6.2% on 39 additional transactions — ticket is holding flat (+0). Growth is transaction-driven, not ticket-driven. Top opportunity: average ticket improvement through bundling and cross-sell at register.

TOP 5 SKUS — REVENUE THIS WEEK

SKU	CATEGORY	UNITS	REVENUE	GROSS MARGIN
Flower 1g	Flower	812	\$5,200	62.0%
Pre-Roll 2pk	Pre-Roll	447	\$3,800	54.0%
THC Gummies 100mg	Edibles	188	\$3,100	48.0%
Vape Cart .5g	Concentrate	132	\$2,900	42.0%
Hash Rosin 1g	Concentrate	61	\$2,650	38.0%

BOTTOM 5 SKUS — SLOW MOVERS (FLAG FOR REVIEW)

SKUs below generated minimal revenue this week and carry elevated days-of-supply. These represent margin drag and working capital tied up in slow inventory.

SKU	CATEGORY	UNITS	REVENUE	DAYS SUPPLY
CBD Tincture 30ml	Other	4	\$180	28d
Beverage 12oz	Beverage	7	\$290	21d
Kief 1g	Other	6	\$210	14d
Accessories Bundle	Accessor.	2	\$145	N/A
Topical Balm 50ml	Other	2	\$95	35d

Beverages and specialty items are tying up cash. Consider a short-term discount or bundling with high-velocity flower SKUs to clear aging inventory before it expires. Expired product must be logged to Metrc immediately — disposal without logging is a compliance violation.

Illustrative synthetic data modeled on a single-location NYC recreational cannabis retailer. Not actual client data. Days supply = estimated on-hand units ÷ weekly velocity. Margin figures are gross margin before excise allocation. · Prepared by Mboya Jeffers · mboyajeffers@gmail.com · (646) 619-6303

INVENTORY VELOCITY — DAYS OF SUPPLY BY CATEGORY

Days of supply is estimated on-hand units divided by the current weekly sell-through rate. Categories below 7 days require reorder evaluation. Categories above 14 days are tying up working capital.

CATEGORY	DAYS OF SUPPLY	STATUS
Flower	4.1 days	NORMAL
Pre-Rolls	5.8 days	NORMAL
Concentrates	7.2 days	WATCH
Edibles	8.5 days	WATCH
Beverages	17.3 days	REORDER
Accessories	9.1 days	NORMAL

Beverages: 17.3 days of supply — action required. At current velocity, beverage inventory will not clear before expiration risk window. Promotional pricing or bundling is the primary lever. Document any disposal in Metrc.

SHRINK, WASTE & VARIANCE

3 EXPIRED UNITS (METRC-LOGGED)	0 UNEXPLAINED VARIANCE	1 DAMAGE / BREAKAGE (LOGGED)
-----------------------------------	---------------------------	---------------------------------

Zero unexplained variance this week. 3 expired units (beverage) and 1 damaged unit (concentrate) were logged to Metrc as required. All shrinkage accounted for. OCM auditors will verify that disposal entries match physical counts — consistent logging is your audit defense.

OPERATIONS EFFICIENCY

BUDTENDER THROUGHPUT 8.2 txn/hr Avg 4.2 budtenders per shift. Peak hour window is 4–6 PM (31% of daily transactions). Consider adding one budtender on weekday afternoons to capture peak throughput without overextending off-peak labor cost.	STAFF TRAINING STATUS PARTIAL 3 of 5 training records current. OCM requires all cannabis handlers to hold current training certifications. Two team members are overdue for renewal. Unresolved at next inspection = potential license condition violation.
--	--

THIS WEEK'S ACTION ITEMS

- 1 Reorder beverages** — 17.3 days supply at current velocity. Reduce next order by 30% and consider a 15% promotional discount on current stock before expiration window.
- 2 Renew 2 staff training records** — schedule training within 7 days to close the compliance gap before next OCM inspection.
- 3 Review concentrate margin** — Hash Rosin at 38% gross margin is the lowest in the top 5. Verify that distributor excise is correctly embedded in COGS; if not, true margin is worse than reported.
- 4 Bundle slow SKUs** — Pair CBD Tincture and Topical Balm with high-velocity flower at a slight discount. Clear aging stock without writing it off.
- 5 Log all shrinkage before week close** — 3 expired + 1 damaged already logged. Confirm no other variance exists before Metrc reconciliation.
